SUMMARY

Motivated and technically proficient person with an experience if more than 1 year in the field of System Integration testing, seeking a job opportunity in the dynamic intersection of hardware and software development. Eager to leverage a strong foundation in electrical engineering to contribute to cutting-edge projects. Excited to apply problem-solving skills, creativity, and adaptability to collaborate on innovative solutions.

EXPERIENCE

Analyst 1, Product Analysis 10/2024 – 07/2026
Enphase Energy India Pvt Ltd Bengaluru

- Performed end-to-end testing of microinverters and batteries.
- Worked extensively with Linux-based applications.
- Managed quality assurance tasks within commercial systems.
- Took a Knowledge Transfer session on Commercial Products and future enhancements and helped team members understand the Commercial systems.
- Developed Automation tools to monitor the Testbeds and send periodic emails to the team members regarding the Testbed health which had reduced the team efforts in debugging he system by 70%.
- Designed and implemented the Testbeds for System Integration Testing.
- Analyzed the overall Office building Electricity consumption and designed a PV + Battery Storage system that can reduce the electricity bill with a ROI of less than 2 years.
- Tools used: Jira, Jama, Testrail, Microsoft Office

Summer Intern 05/2023 – 07/2023
RS GROUP

- Gained knowledge on the electrical systems in a oil refinery company
- Visited to BPCL Kochi Refinery and understood different processes and working of a Refinery plant

EDUCATION

Mtech in Power Electronics and Power Systems 07/2026 – Present
Indian Institute of Technology Palakkad
CGPA-

BTech In Electrical and Electronics Engineering 2020 – 2024
National Institute of Technology Calicut
CGPA-8.42

Plus Two 2019
Viswabharathy Public School
CBSE Percentage: 96

10th 2017
Viswabharathy Public School
CBSE CGPA : 10

PROJECTS

Robust Controller Design for MIMO Systems
Designed Controllers using Pole Placement Method, H infinity Method, Eigen Structure Assignment and LQR Method for Twin Rotor MIMO System (TRMS) and Reusable Launch Vehicle (RLV) under ISRO

LPG Gas Leakage Detector using Arduino and PIC Microcontroller
Successfully designed LPG gas leakage detector using Arduino and PIC Microcontroller which measures the amount of LPG gas present in the atmosphere and alarms when it exceeds a certain limit

Buck Converter
Designed and assembled a Buck converter which step down 9V to 5V and 3.3 V using the required components, along with winding of inductor.

ROOMBA - E-Mail Management
Designed a software that deletes unwanted emails using predefined keywords, helping the inbox not to be overflowed with unwanted emails and free the Account storage.

SKILLS

- Embedded Systems
- Analog Electronics
- MATLAB
- Prompt Engineering
- Python
- Linux
- Digital Electronics
- Microsoft Office
- LTSpice
- AI-Powered Content Creation
- HTML/CSS

CERTIFICATIONS

Digital IC Design - NPTEL course
Completed NPTEL Swayam course and secured Elite certificate

Chip Design Program
Participated in Chip Design Program held at NIT Calicut in collaboration with IBM

Workshop on Electric Vehicles - Techmaghi
Participated in a workshop on Electric Vehicles conducted by Techmaghi gaining in-depth knowledge in EV technology and systems

LANGUAGE

- English
- Tamil
- Malayalam
- Hindi

INTERESTS

- Music
- Reading
- Badminton
- Painting
